

1600+ Global Networks
50 Global PoPs
43 Cities
26 Countries
Massive IPv4 / IPv6 Global Pool

ANY SERVER. ANYWHERE.

MOD Mission Critical's global hosting solution gives enterprises and SMB organizations access to best-of-breed datacenter hosting with global network access. Super flexible and fully- customizable, global hosting puts the power of choice in your hands allowing you to choose the service specifications, providers, and geographical markets your business needs to expand your digital footprint.

MOD Mission Critical is an international Managed Services Provider (MSP) specializing in colocation and global network services and solutions. Our customer-centric approach and core belief in transparency are the foundation of our long-lasting relationships with clients, partners, and vendors alike.

GLOBAL NETWORK FABRIC LOCATIONS

With more than 50 international points of presence locations in 43 cities and 26 countries, MOD's global network fabric, with reach to over 1600 unique networks, enables you to easily expand into new markets across the globe without the frustration and high costs of doing it alone. Quickly deploy bare metal, virtual switch points, and firewalls all supported by MOD Mission Critical's fanatical support and competitive wholesale rates. No markups, always-on support, and scalable solutions at your fingertips.

TECHNICAL SPECIFICATIONS

Our virtual capabilities are scalable and customizable to suit any business need. From virtual dedicated physical server environments to your own dedicated switch, all of our solutions can be customized to meet your security, reliability, and standard level of service agreements your business requires. Couple that with the extensive global reach of our network partners, we can provide public, private or hybrid cloud, IPv4 and IPv6 customized address space, Internet, and connectivity solutions that manage and deliver your data both securely and reliably.

WHEN YOU NEED MORE, YOU NEED BARE METAL.

More Performance

Enjoy guaranteed levels of service and performance for high-traffic websites, complex portals advanced applications like SaaS, VoIP, video conferencing, cloud connectivity, Internet access and even online gaming.

More Access to Hardware

Access the best-in-class hardware equipped with the latest and greatest software and functionality from the newest generation of Intel Xeon CPUs to DDR4 RAM with error-correcting code (ECC). All customized and configured to meet your specific business needs. Our experienced team provides you with the guidance necessary to ensure an always-on environment, even if you or your team are unsure. That's why we're here.

More Control Over Resources

MOD Mission Critical's solutions are designed to provide you with greater control of your compute resources and server environments, leveraging a single-tenant hosting configuration that ensures the most secure environment with the ability to easily conform to data processing regulations like GDPR.
